User Story #1

As a lab group member, I would like to see what technical skills my group has as a collective and see which member has any specific skills that I am looking into.

Test Cases

Description: Setup-profile add technical skill

Input: Type skill in box and click “Add”

Observed Output: Skill should show up under technical skills in the personal profile, and under members for any labs the user is in

Acceptable: Yes

Description: Edit-profile add technical skill

Input: Type skill in box and click “Add”

Observed Output: Skill should show up under technical skills in the personal profile, and under members for any labs the user is in

Acceptable: Yes

## Manual Test Plan — US#9 Split Costs

Prerequisites:

App running at <http://localhost:3000>

Two test accounts created: User A (group leader) and User B (group member)

One travel group exists with both users as members

A third account User C who is NOT in the group

### US#9 — Split Costs

**Test-9.1:** Equal split saved correctly (AC1 & AC2)

Log in as User A

Navigate to group → Expenses → + Add Expense

**Fill:**

Title Uber

Amount 100

Paid by User A

Participants: User A + User B

Split Type: Equal

Click Save

Navigate to the Splits tab

**Expected:** A split entry for Uber appears. Each participant shows \$50.00. The expense card in Ledger shows \$50.00 each.

**Test-9.2:** Custom amount split saved correctly (AC3)

Log in as User A, open + Add Expense

**Fill:**

Title Club

Amount 100

Participants: User A + User B

Split Type: Custom Amount

Enter:

User A: 70

User B: 30

Click Save

**Expected:** Split saved. In the Splits tab, User A shows \$70.00 and User B shows \$30.00. In the Ledger, User A's card shows \$70.00 your share.

**Test-9.3:** Custom percentage split saved correctly (AC3)

Open + Add Expense

**Fill:**

Title Airbnb

Amount 200

Participants: User A + User B

Split Type: Custom Percentage

**Enter:**

User A 60%

User B 40%

Click Save

**Expected:** Split saved with User A = \$120, User B = \$80 (percentages applied to \$200).

**Test-9.4:** Invalid custom split blocked (AC4)

Open + Add Expense

Amount 100

Split Type: Custom Amount

**Enter:**

User A 60

User B 60 (total = \$120)

Click Save

**Expected:** Form blocks submission with an error that totals must match the expense amount.

Switch to Custom Percentage

**Enter:**

User A 60%

User B 60% (total = 120%)

Click Save

**Expected:** Form blocks submission with an error that percentages must sum to 100%.

**Test-9.6:** Creator/admin can edit a split (AC6)

Log in as User A (creator of the Club split)

Navigate to Splits tab  
Find the Club split

Click Edit  
Change User A's amount to 80  
Change User B's to 20

Click Save

**Expected:** Split updates to show User A \$80, User B \$20. The Ledger card reflects updated values.

**Test-9.8:** Creator/admin can delete a split (AC6)

Log in as User A  
Navigate to Splits tab

Click Delete on a split  
Confirm deletion

**Expected:** Split is removed. The Ledger reflects updated distribution.

## **Manual Test Plan — US#10 Post Shared Cost**

Prerequisites:

App running at <http://localhost:3000>

Two test accounts created: User A (group leader) and User B (group member)

One travel group exists with both users as members

A third account User C who is NOT in the group

### **US#10 — Post Shared Cost**

**Test-10.1:** Post a valid shared cost (AC1 & AC2)

Log in as User A  
Navigate to the group → click "Expenses" in the sidebar  
Click "+ Add Expense"

**Fill in:**

Title: Hotel Stay

Amount: 200

Currency: USD

Paid by: User A

Participants: select both User A and User B

Category: Accommodation  
Split Type: Equal  
Date: today

Click Save

**Expected:** Modal closes, expense appears in the All Expenses list showing \$200.00 total and \$100.00 each. The Total Spent counter increments by \$200. The entry shows the correct payer, participants, category, and date.

**Test-10.2:** Form validation — missing required fields (AC3)

Log in as User A, open Add Expense

Leave Title blank, fill everything else correctly

Click Save

**Expected:** Form does not submit. Error message appears mentioning title.

Fill title, set Amount to -50

Click Save

**Expected:** Form blocks submission. Error mentioning amount.

Fill amount correctly, remove all Participants

Click Save

**Expected:** Form blocks submission. Error mentioning participants.

**Test-10.4:** Edit a shared cost as creator (AC5)

Log in as User A (creator of Hotel Stay)

Navigate to Expenses, click on the Hotel Stay expense

Click Edit

Change title to Hotel Stay Updated, amount to 250

Click Save

**Expected:** Expense list updates to show Hotel Stay Updated with \$250.00. The Total Spent and Your Share cards reflect the new amount.

**Test-10.6:** Delete as creator (AC5)

Log in as User A

Navigate to Expenses, click on an expense they created

Click Delete → confirm

**Expected:** Expense is removed from the list. Total Spent decreases accordingly.

**Test-10.7:** Balances reflect new expense (AC7)

Log in as User A, add expense: Dinner, \$100, paid by User A, equal split between User A and User B

Check the Your Balance card

**Expected:** Balance shows User A is owed \$50 (paid \$100, owes \$50 of their own share). The Settlement Summary shows User B owes User A \$50.

Log in as User B, navigate to the same group's Expenses

**Expected:** Your Balance shows -\$50 (owes \$50). Settlement Summary shows "You owe [User A] \$50".

## **Manual Test Plan — US#11 Group Photo Album**

Prerequisites:

App running at <http://localhost:3000>

Two test accounts created: User A (group leader) and User B (group member)

One travel group exists with both users as members

Test Cases

Description: Upload one or more photos (as user A)

Input: Click "Add Photos" button and select one or more photos

Observed Output: Photo(s) should upload to server and populate in client UI

Acceptable: Yes

Description: Upload a photo that is too large (as user A)

Input: Click "Add Photos" button and select photo over 10MB

Observed Output: User should be alerted that the photo is too large

Acceptable: Yes

Description: Photos populate client page on load (as user A and B)

Input: Photos uploaded previously and click photos tab inside group

Observed Output: User should see photos that have been uploaded to the group

Acceptable: Yes

Description: Uploaded photo is deleted (as user A)

Input: Delete button pressed on uploaded photo

Observed Output: User should see the photo depopulate from the UI and reflect on reload

Acceptable: Yes

Description: No photos are selected by user (as user A)  
Input: Click "Add Photos" button and select no photos  
Observed Output: User should see alert that no photos were selected  
Acceptable: Yes (cannot select none as the file picker does not allow it)

### **Manual Test Plan — US#12 Manage Push Notifications**

Prerequisites:

App running at <http://localhost:3000>

Two test accounts created: User A (group leader) and User B (group member)

One travel group exists with both users as members

Test Cases

Description: Changes to settings take effect after save (as user A)

Input: Toggle one or more settings and press "Save"

Observed Output: Settings should update server side as well as keep their state on the client

Acceptable: Yes

Description: User disables push notifications (as user A)

Input: Go to settings page and toggle notification off

Observed Output: User should not receive notifications from notification toggled off

Acceptable: Yes

### **Manual Test Plan — US#13 Group Email Notifications**

Prerequisites:

App running at <http://localhost:3000>

Two test accounts created: User A (group leader) and User B (group member)

One travel group exists with both users as members

Test Cases

Description: Message is sent to group members on submit (as user A)

Input: Go to notify tab in group, create message, click "Send Message"

Observed Output: Message should be emailed to users who have notifications enabled

Acceptable: Yes

Description: Submission of message reports failure/success (as user A)

Input: Go to notify tab in group, create message, click "Send Message"

Observed Output: User should see "Message Sent" text

Acceptable: Yes

Description: Empty message content submission (as user A and B)

Input: Go to notify tab in group, create message, click "Send Message" with no input

Observed Output: User should see an alert about needing content in the message

Acceptable: Yes

## **Manual Test Plan — US#17 Group Polls**

Prerequisites:

App running at <http://localhost:3000>

Two test accounts created: User A (group leader) and User B (group member)

One travel group exists with both users as members

Test Cases

Description: Active polls are populated on polls page (as user A)

Input: Go to polls tab in group

Observed Output: Active polls should be present on the page

Acceptable: Yes

Description: Voting on poll (as user A)

Input: Go to polls tab in group and vote on any poll

Observed Output: User should see vote populated on the client and persist across reload

Acceptable: Yes

Description: Removing vote from poll (as user A and B)

Input: Go to polls tab in group and remove vote on any poll

Observed Output: User should see vote depopulate on the client and persist across reload

Acceptable: Yes

Description: Delete created poll (as user A)

Input: Go to polls tab and press delete button on any poll

Observed Output: User should see poll removed and persist across reloads

Acceptable: Yes

Description: No delete button for others polls (as user A)

Input: Go to polls tab

Observed Output: User should not see delete buttons for polls they did not create

Acceptable: Yes
